**Rejection Under 35 U.S.C. §102(b)**

Claims 1-24 have been rejected as anticipated by WO 2001/96119 (Savariar-Hauck et al.). This rejection is respectfully traversed again for the following reasons.

It is axiomatic that for a reference to anticipate a claimed invention, every feature of that invention must be described in the reference. That is not the case with the presently claimed invention and the cited Savariar-Hauck et al. reference.
